Page loads: Body slides up from bottom
load icon visible till content
is populated of screen

Re Articles:
FindAll

Article

[Article]

Not needed,
small Div shows
preview.

Starts w/ Results page:
  └ when article clicked it
    ~~slides~~ fades results div,
    shows loading icon,
    then Article slides up

Full Articles:
use a near Full screen slider to display/
highlight the terms.
  └ New Page is easier, Also
separates results from Full doc
